

## ARTICLE VIII - MISCELLANEOUS TREATMENT REQUIREMENTS

### Section 1. Grease Traps Required

- (a) Grease, oil, sand interceptors and flow equalization shall be provided, when, in the opinion of the General Manager, they are necessary for the proper handling of liquid wastes containing grease, sand, other harmful ingredients or rate of flow; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be located as to be readily and easily accessible for cleaning and inspection.
- (b) Grease Trap Maintenance:  
All grease, oil, sand interceptors shall be pumped out on a periodic bases. All Commercial/Industrial firms will provide a copy of service contract with a City of Peachtree licensed waste hauler. The items that must appear in the contract:
  - (1) Frequency of service (Minimum is 30 days)  
Unless The Commercial/Industrial User can show the Authority that the amount of this type of waste does not cause overflow in excess of the limit set in this Ordinance or the permit of the commercial/industrial firm.
  - (2) Size of Interceptor (Gallons);
  - (3) Price per gallon for pumping and hauling of waste;
  - (4) Site of disposal of interceptor waste;
  - (5) Statement that total contents of interceptor will be removed on each service trip; and
  - (6) Commercial/Industrial User will notify Authority Representative no later than three (3) days after interceptor is pumped for inspection.

### Section 2. Maintenance of Treatment Facilities

When preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the Owner at his/her expense. Users shall provide wastewater treatment as necessary to comply with this Ordinance and shall achieve compliance with all categorical pretreatment standards, local limits, and the prohibitions set out in this Ordinance within the limitations specified by EPA, the state of Georgia, or the Authority, whichever is more stringent. Any facilities necessary for compliance shall be provided, operated, and maintained at the

User's expense. Detailed plans describing such facilities and operating procedures shall be submitted to the Authority for review, and shall be acceptable to the Authority before such facilities are constructed. The review of such plans and operating procedures shall in no way relieve the user from the responsibility of modifying such facilities as necessary to produce a discharge acceptable to the Authority under the provisions of this Ordinance.

### Section 3. Manholes Required

When required by the Authority's General Manager, the owner of any property serviced by a building sewer carrying industrial or commercial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessible and safely located and shall be constructed in accordance with plans approved by the Authority's General Manager. The manhole shall be installed by the Owner at his/her expense, and shall be maintained by the Owner so as to be safe and accessible at all times.

### Section 4. Removal, Transportation and Disposition of Scavenger Wastes

- a) The Authority's General Manager may require a permit for the discharge of scavenger wastes after submission of an application on forms supplied by the Authority. The Authority may also prohibit disposal of scavenger waste, including hauled industrial waste. All other materials and substances, chemical or chemical compounds and/or industrial wastes will not be permitted to be discharged into the public sewerage system except as heretofore provided.
- b) The discharge of the wastes in (a) above shall be made only at a location in the sewage treatment plant and at such times as may be designated by the Authority. Such waste shall not violate Article VI of this Ordinance or any other requirements established by the Authority.
- c) Scavenger wastes, at the option of the Authority, may be admitted into the sewerage system only by permit and subject to payment of a fee, according to the fee schedule established by the Authority.
- d) The applicant shall be the owner of the vehicle discharging the wastes.
- e) Prior to discharging any scavenger wastes, the applicant shall be required to file a statement identifying the exact location of the waste source or sources of each load discharged. Industrial

waste haulers must provide a waste-tracking form for every load. This form shall include, at a minimum, the name and address of the industrial waste hauler, permit number, truck identification, names and addresses of sources of waste, and volume and characteristics of waste. The form shall identify the type of industry, known or suspected waste constituents, and whether any wastes are RCRA hazardous wastes. Any false, misleading or untruthful statement as to the nature or source of the material shall be cause for rejection of any further discharge from the applicant. Such discharges may also be suspended or terminated at any time by the Authority's General Manager.

- f) All equipment, such as trucks, tanks, pumps, and hoses used in the collection and/or transportation of scavenger wastes shall be modern equipment in good repair. When more than one vehicle is used by an applicant, each vehicle shall bear an identifying number.
- g) All applicants for a permit shall furnish the following information with each application:
  - 1) Name and address of applicant;
  - 2) Volume of scavenger waste for each numbered vehicle; and
  - 3) Number of scavenger vehicles in collection service.
